

PRAGATI KAVRA

Kasganj, Uttar Pradesh | +91 7668489390 | pragati.kavra_cs23@gla.ac.in | LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

Computer Science Engineering student (B.Tech, expected 2027) with a strong foundation in data structures, algorithms, object-oriented design, operating systems, and computer networks. Hands-on experience building full-stack, multi-tier web applications and REST APIs using Java, Python, JavaScript, React.js, Node.js, SQL, and MongoDB, with working familiarity in generative AI tools for accelerated development. Comfortable working in agile environments and effectively communicating technical work to peers and leadership.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Core CS Fundamentals: Object-Oriented Design (OOP), Data Structures & Algorithms, Complexity Analysis, Operating Systems, Computer Networks, DBMS

Frontend: HTML, CSS, React.js, Tailwind CSS

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, Client-Server Architecture

Databases: MySQL (Relational), MongoDB (NoSQL)

Tools & Practices: Git, GitHub, Postman

INTERNSHIP EXPERIENCE

Java Developer Intern — CodSoft (Remote)

2025

- Designed and developed Java-based applications applying object-oriented design principles, data structures, and algorithmic problem-solving techniques.
- Strengthened core Java programming fundamentals through hands-on implementation of application logic, debugging, and coding challenges under agile delivery timelines.

PROJECTS

Prepzo AI — AI-Powered Interview Preparation Platform

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, LLMs, Vercel, Render

Live Demo: <https://prepzo-ai-frontend.vercel.app> | GitHub: github.com/pragatikavra28/prepzo-ai

- Built an AI platform that analyzes resumes vs. job descriptions to generate personalized interview strategies.
- Built LLM-based resume analysis, match scoring, and interview question generation pipelines.
- Implemented JWT authentication, guest access, and a responsive React.js dashboard.
- Deployed full-stack MERN app on Vercel and Render with MongoDB Atlas.

The Last Minute App — Full-Stack Booking Platform

Tech Stack: React.js, Node.js, Express.js, PostgreSQL, Redis, Docker

Live Demo: <https://lastminute-app-frontend.onrender.com> | GitHub: github.com/pragatikavra28/TheLastMinuteApp

- Built a microservices-based booking platform (auth, listings, bookings, payments) with JWT authentication and a responsive React.js frontend.
- Prevented double bookings using PostgreSQL row locking, transactions, and idempotent requests, with Redis for caching and sessions.

EDUCATION

B.Tech in Computer Science & Engineering — GLA University, Mathura

Expected Aug 2027

CGPA: 7.44/10 | Relevant coursework: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks

Intermediate — J.P. Public Academy, Kasganj

2023

65.8%

High School — J.P. Public Academy, Kasganj

2021

69%

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Certified Generative AI Professional | Meta Certified Front End Developer
- Career Essentials in Generative AI by Microsoft and LinkedIn | Google Workspace (Infosys Springboard)
- Solved 250+ programming and DSA problems across coding platforms; achieved a 3★ + rating on HackerRank

LEADERSHIP & ACTIVITIES

- Social Media Head, Prakriti Club, GLA University — presented regular technical project updates to club leadership and peers.
- Technical Associate, Literario Club, GLA University — assisted in organizing technical workshops and university events.
